Capability Statement

WHO WE ARE

ACR Consultants, Inc. is a small business formed in 1999. Our staff possesses expertise in prehistoric, historic, industrial and military archaeology, historic preservation, and historic structure recording; cultural anthropology; and liaison services for nation-to-nation consultation. ACR stays abreast of issues affecting our clients, and is an active member of NAOC.

CAPABILITIES

Our **UXO Tech-certified archaeologists** will help ensure that UXO projects maintain compliance with cultural resource laws and regulations without sacrificing efficiency. They understand the UXO industry, work in the exclusion zone, and can serve “double duty” as Tech 1s on any team. Our services include:

- Consultation services for compliance with cultural resource laws, regulations, and guidelines: NHPA, NAGPRA, ARPA, NEPA, UNESCO, etc.
- Project scoping and consultation for large projects
- File search and literature reviews
- Archaeological site identification, recording, & evaluation
- Archaeological site mitigation & data recovery
- Coordination with agency and government authorities

GLOBAL REACH

Our UXO Tech/Archaeologists work wherever your project requires cultural resource support—**all 50 states, US territories, and anyplace your mission takes you.** ACR teams its uniquely-qualified archaeologists with regional experts to ensure the best value in regulatory compliance.

ACR provides commercial and agency clients with the best solutions for projects requiring compliance with international cultural resource laws and regulations.

ACR UXO DIVISION: BEST VALUE FOR CULTURAL RESOURCE COMPLIANCE ON UXO PROJECTS

REPEAT CLIENTS

ACR invests in the UXO certification of some of the best and brightest archaeologists to help clients comply with cultural resource regulations on **active ranges, BRAC facilities, FUDS properties, CWM, radiological, and conventional sites, historical battlefields, and in active theatres of operations.**

Helping our clients maintain compliance with the National Historic Preservation Act (NHPA), the Native American Graves and Repatriation Act (NAGPRA), and various state and national laws has contributed to ACR's high client retention rate. ACR is recognized for responsiveness, attentive staff, and fast turnaround on quality deliverables.

Federal Agencies Served: US Army Corps of Engineers, Department of Defense, Department of the Army, Department of the Air Force, Department of the Navy, Nuclear Regulatory Commission, Department of Energy, Department of State, Federal Energy Regulatory Commission, Forest Service, National Park Service, Bureau of Land Management, State Historical Preservation Office

ACR UXO Division is a proud strategic partner with sister company ISSI Unexploded Ordnance, Inc.

This partnership provides ventures with access to expertise in niche specialties: cultural resources, human terrain services, TA/VA and technical security consulting, Bomb threat/bomb search, CIED and CBRN training, and CWM/BWM response. Contact Robert "Mike" Sterling at (256) 655-1253 for information on ISSI UXO, Inc.

FEATURED PROJECTS

Vancouver Barracks MMRP-RI/FS (2011)

ACR UXO-tech/archaeologists **worked inside the EZ to help our client complete this project ahead of schedule.** The project maintained full compliance with cultural resource laws while working within the Fort Vancouver Historic District. Archaeological monitoring avoided impacts to 1700s-1940s archaeological sites on this BRAC facility.

Pole Mountain Geophysical Survey, RI/FS, and MMRP (2009-2011)

ACR participated as members of the UXO team for the 2009 MMRP phase of this project, and **our participation was mandated by the Army Corps of Engineers for subsequent UXO contracts awarded on this WWI-WWII Training and Maneuver Area (TMA).** ACR participated in geophysical surveys (2010) and MMRP and RI/FS phases at the NW Firing Area and Eagle Rock Impact Area Munitions Remediation Sites in 2011. MEC and MD were reported as components of a historic landscape. ACR UXO technicians and archaeologists served clients for over 18 months, contributing to the timely closure of the Pole Mountain TMA FUDS property.

In my opinion, this report is an excellent piece of work that clearly represents an awful lot of effort in compiling and assembly. The writing is to the point, things are adequately described and illustrated. Your approach to dealing with the massive amount of material was an excellent way to integrate the new information. I know we worked that out between the two of us, but your implementation was spot on.
